SUMMARY

Experienced Software Engineering student specializing in Android development and AI. Proficient in Kotlin, Flutter, Python, and Jetpack Compose. Passionate about **Secure Coding** and **Application Security**, with a strong interest in building scalable, secure mobile applications. Eager to leverage skills in a security-focused environment like Checkmarx.

EDUCATION

Amrutvahini College of Engineering

BE in Information Technology

Sangamner, Maharashtra

2023 – 2027 | CGPA: 8.0/10

SKILLS

Programming Languages:

Kotlin, Java, Python, JavaScript, SQL, C++

Mobile Development:

Android (Jetpack Compose, XML), MVVM, Retrofit, Room, Coroutines

Backend & Web:

RESTful APIs, Node.js, Flask, Firebase (Auth, Firestore), HTML, CSS, React, Next.js

Software Engineering:

API Design, Git, GitHub, Authentication Flows, Modular Architecture

AI / ML:

TensorFlow, OpenCV, YOLOv8, Model Integration

Tools:

Android Studio, Postman, Figma

CERTIFICATIONS

Google - Gen AI Exchange Program

- Generative AI • Prompt Engineering
- Model Deployment • Responsible AI

OpenCV University - AI & Computer Vision Bootcamps

Mastered 5 bootcamps (100% Grade): PyTorch, TensorFlow, Keras, OpenCV, VLMs. Implemented **YOLO11**, **Faster/Mask R-CNN**, **OpenPose**, **CLIP**, **Qwen2.5-VL**, Object Tracking, & HDR.

ACHIEVEMENTS

Hackathons: Participated in 10+ National Hackathons.

SIH Finalist: Smart India Hackathon Grand Finale.

IEEE Summer of Code: Top 50 Open Source Contributor.

DevPath: Led community of 1000+ developers.

EXPERIENCE

Android Developer Intern

Jan 2025 - Apr 2025

Google | EduSkills Foundation

Remote

- Contributed 4+ Android modules to open-source projects, improving UI responsiveness by **30%**.
- Architected **3+** production-grade Android Apps (MVVM) integrating Retrofit & Firebase, handling **500+** daily transactions.

Software Engineering Virtual Intern

June 2024

Accenture Nordics

Remote

- Improved client performance metrics by **20%** via data-driven insights and process optimization.
- Formulated tech transformation strategies, reducing project delivery timelines by **15%**.

Project Trainee

Aug 2024 - Nov 2024

ABB

On-site

- Spearheaded digitalization initiatives to automate process flows aligned with **Industry 4.0**, reducing manual effort by **25%**.
- Designed automated solutions using **Power Automate** and **Power Apps**, streamlining workflows for **50+** employees.
- Optimized production operations by analyzing on-site processes and implementing efficient digital tools.

PROJECTS

DevPath Community Website

Jan 2025 - Present

- Orchestrated a community of **1000+** active developers; built dynamic platform (Next.js).
- Implemented secure auth and real-time event updates, boosting engagement by **25%**.

Saksham | Smart India Hackathon Project

Jan 2025 - Present

- Engineered an enterprise-grade Android platform connecting citizens to **100+ government schemes** using **Jetpack Compose**.
- Integrated **AI-based OCR** for document verification and **multilingual support** (9 languages) via ML Kit.

Code Brahma : AI Debugging

Oct 2024

- Created an Android app for code debugging, reducing debug time by **30%** via AI insights.
- Integrated GitHub OAuth and Firebase for secure, seamless user authentication.

Engilearn

Nov 2024 - Present

- Launched a **fully scalable SaaS** app for AI-based quiz generation, deployed on **IaaS** (AWS).
- Engineered a robust backend to handle concurrent users, ensuring **99.9%** uptime.

Traffic Optimization System

Sep 2024

- Built a live traffic monitoring system using YOLOv8 & Agentic AI, achieving **95%** detection accuracy.
- Guided a 6-member team to deploy the solution, optimizing route efficiency by **20%**.
